Reissue Applications

1. Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,542,143 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

2. Claims 1-8,47-48 are rejected as being based upon a defective reissue oath/declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the oath/declaration:
the reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

Response to Arguments

3. Applicant's arguments filed 12/10/07 have been fully considered but they are not persuasive:

The Reissue Application Declaration filed on 02/03/04 is defective because it still fails to identify at least one error which is relied upon to support the reissue application with relation to originally filed claims 1-8 and also it fails to identify errors which is relied upon to support the reissue application in relation to newly introduced claims 47-48.

On page 2, item 6 of Oath/Declaration, Applicant stated that to consider U.S. Patent No. 6,542,143 to be partly inoperative by reason of claiming less than we had a right to claim because the original claims were unduly limited and may not provide an adequate scope of protection. For example, claim 1 is too limiting because it recites correction digital data for compensating for display characteristics of a display element.

However, newly introduced claims 47-48 are limiting the scope of original independent claim 6 by specifying the type of correction data (claim 47) or setting limitations on the number of bits (claim 48).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2629

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
